Subject: [cogr-l] Update on Tech Corrections to the Uniform Guidance

Follow Up Flag: Flag for follow up
Flag Status: Completed

After a meeting with COFAR representatives on Friday, they were not able to confirm the status of COGR's proposal to incorporate important technical corrections into the Uniform Guidance. During the meeting, and in a letter we sent after the meeting, we emphasized that there is a sense of urgency to get responses on a number of our key requests (including the treatment of the DS-2 Disclosure Statement).

If you are moved to call OMB to raise specific institutional concerns, we encourage you to do so. If you need contact info, COGR can provide it.

While it is frustrating that we do not have the important answers at this late stage, COGR is committed to persistence and affecting the best possible outcome. We will provide regular updates before and after the Thanksgiving Holiday.
